casa com vida

Uma casa é uma parte de nós, da nossa vida. Por isso na CINCA investimos todos os nossos esforços para que se sinta em harmonia com a casa que o envolve. Seja clássica, elegante, romântica, moderna, minimalista ou exótica, a CINCA apresenta uma selecção de produtos de qualidade e design cuidado, acompanhando as mais recentes inovações tecnológicas e tendências do mercado.
Com mais de 40 anos de experiência, tanto no segmento técnico como residencial, a CINCA oferece uma gama completa de séries em diversas tipologias, formatos, superfícies, cores e decorações, capazes de satisfazer o estilo de cada casa. Desde o tradicional 15x15 ao moderno 32x75 rectificado em pasta branca de qualidade, aos resistentes pavimentos em porcelânico plena massa, decorado, para interior ou exterior, passando pelas ricas e fascinantes decorações em 3º fogo, ou o extrudido com o seu aspecto natural.
Múltiplas opções para libertar a sua imaginação e satisfazer as suas escolhas.
Sinta a casa com vida...

A home with life

A home is a part of us - a part of our lives.
Therefore, at CINCA we devote all our efforts to enabling you to live in harmony with the space that surrounds you.
Classical, elegant, romantic, contemporary, minimalist or exotic; CINCA presents a selection of quality products of superior design in tune with the most recent technical innovations and market trends.
With over 40 years of experience in both the technical and residential sectors, CINCA offers a complete choice; diverse series with a variety of different formats, surfaces, colours and decorations which are adaptable to the style of any home.
From the time-honoured 15x15 to the contemporary 32x75 rectified in high quality white body; to resistant floors in full body porcelain tiles, decorated for interior or exterior, the rich and fascinating decorations of 3rd fire and our extruded product with its natural appearance. Numerous options to free your imagination and to fulfil your choices.
Fill your home with life...

Une maison qui vit

La maison est une partie de nous, de notre vie.
C'est pourquoi chez CINCA nous investissons tous nos efforts pour que vous vous sentiez en harmonie dans votre maison. Qu'elle soit classique, raffinée, romantique, moderne, minimaliste ou exotique, CINCA présente une sélection de produits de qualité et au design travaillé en suivant les innovations technologiques et les tendances de marché les plus récentes.
Avec plus de 40 ans d'expérience, dans le domaine technique comme dans le domaine résidentiel, CINCA offre une gamme complète de séries dans différentes typologies, formats, superficies, couleurs et décorations, capables de satisfaire une grande variété de styles de maison. Depuis le produit traditionnel typiquement portugais 15x15 au produit le plus moderne 32x75 rectifié en pâte blanche de parfaite qualité ou encore aux grés cérames en pleine masse, decoré très résistants pour sols d'extérieur et d'intérieur comme aussi les grés étirés aux tons naturels, en passant par les riches décorations en 3ème feu. Multiples options pour laisser aller votre imagination et satisfaire vos exigences.
Laissez entrer la vie dans votre maison...

Ein Haus voller Leben

Eine Wohnung ist ein Teil von uns, ein Teil unseres Lebens. Daher bündeln wir bei CINCA all unsere Energie damit Sie sich in Harmonie mit Ihrer Wohnung verbunden fühlen. Ob klassisch, elegant, romantisch, modern, minimalistisch oder exotisch, CINCA präsentiert eine Auswahl an Qualitätsprodukten mit ansprechendem Design, mit denen wir die letzten technologischen Innovationen und Tendenzen des Marktes umsetzen.
Mit mehr als 40 Jahren an Erfahrung, sowohl im technischen als auch im Wohnbereich, bietet CINCA eine vollständige Auswahl von Serien in diversen Typologien, Formaten, Oberflächen, Farben und Dekorationen, die in der Lage sind, die unterschiedlichen Wohnstile zu befriedigen: vom traditionellen Format 15x15 über den modernen 32x75 rektifiziert, in weißscherbiger Qualitätspaste bis hin zum widerstandsfähigen durchgefärbten dekorierten Feinsteinzeug für den Innen - und Außenbereich. Nicht zu vergessen sind hierbei die hochwertigen und faszinierenden Dekorationen des 3. Feuers sowie die Spaltplatten mit ihrem natürlichen Aussehen.
Eine Vielzahl von Möglichkeiten Ihre Fantasie auszuleben und Ihre Auswahl zu treffen.
Füllen Sie Ihr Haus mit Leben...

qualidade, ambiente e segurança

Consciente do seu papel na construção de um futuro alicerçado na sustentabilidade, a CINCA desenvolveu, implementou e mantém um Sistema Integrado de Gestão abrangendo os vectores Qualidade, Ambiente e Segurança, e fundamentado no reconhecimento internacional dos referenciais normativos ISO 9001, ISO 14001 e OHSAS 18001.

Os pavimentos e revestimentos cerâmicos da CINCA são fabricados usando as Melhores Técnicas Disponíveis (MTD ou BAT - Best Available Techniques) para a indústria cerâmica, reduzindo o consumo de energia e recursos naturais a um mínimo. A produção de ladrilhos cerâmicos da CINCA usa apenas matérias primas naturais e vidros certificados. Todos os materiais de embalagem (caixas, plásticos e paletes) são totalmente recicláveis e podem facilmente ser reutilizados.

A permanente monitorização de processos e sistemas permite a melhoria da qualidade com minimização de desperdícios e maximização de recursos por forma a minimizar os impactos ambientais decorrentes da sua actividade. A CINCA tem implementados apertados sistemas de controlo ambiental que, em muitos aspectos, vão muito além dos estritos requisitos legais estabelecidos na União Europeia.

Em condições normais de utilização, a esperança de vida dos pavimentos e revestimentos cerâmicos é superior a qualquer outro produto destinado à mesma aplicação. Os produtos cerâmicos são considerados completamente inertes e não é necessário qualquer cuidado especial no seu tratamento como resíduo. Na eventualidade de renovação, os ladrilhos cerâmicos podem ser facilmente recicláveis e usados como matérias primas para outras indústrias.

CINCA: Cerâmica de Qualidade com Respeito pela Natureza.

Implemented in the Design, Development, Production and Trading of Ceramic Floor and Wall Tiles

Qualité, environnement et sécurité

Consciente de son rôle dans la construction d'un avenir fondé sur la durabilité, CINCA a développé, mis en œuvre et maintient un système intégré de gestion qui inclut les facteurs Qualité, Environnement et Sécurité et qui est basé sur la reconnaissance des normes internationales de référence : ISO 9001, ISO 14001 et OHSAS 18001.

Les carrelages sols et murs de CINCA sont fabriqués en utilisant les meilleures techniques disponibles (MTD ou BAT – Best Available Techniques) dans l'industrie céramique, réduisant ainsi au minimum la consommation d'énergie et des ressources naturelles. La production des carreaux en céramique CINCA emploie uniquement des matières premières naturelles et des émaux certifiés. Tous les emballages (cartons, plastiques et palettes) sont totalement recyclables et peuvent être facilement réutilisés.

Le contrôle permanent des processus et des systèmes permet une amélioration de la qualité en réduisant au minimum les dépenses et en maximisant les ressources afin de minimiser les impacts environnementaux liés à son activité. CINCA a mis en œuvre des systèmes stricts de contrôles environnementaux qui, en beaucoup d'aspects, vont bien au-delà des strictes conditions légales établies par l'Union européenne.

Dans des conditions normales d'utilisation, la durée de vie des sols et des revêtements en céramique est supérieure à tout autre produit destiné à la même application. Les produits céramiques sont considérés comme étant complètement inertes et ne nécessitent aucun soin spécial dans son traitement en tant que résidu. Dans le cas des rénovations, les carreaux céramiques peuvent être facilement recyclés et utilisés comme matières premières pour d'autres industries.

CINCA : Une céramique de qualité qui respecte la nature.

Quality, environment and safety

Conscious of its role in building a future based on sustainability, CINCA has developed, implemented and continues to maintain an Integrated Management System in respect of Quality, Environmental and Safety matters, based on international recognition of the relevant standards, (ISO 9001, ISO 14001 and OHSAS 18001).

Cinca's wall and floor tiles are manufactured to the highest production standards (BAT – Best Available Techniques) in the ceramic Industry, reducing the consumption of energy and natural resources to a minimum. The production of ceramic tiles at Cinca uses only natural raw materials and certified glazes. All packaging materials (boxes, plastics and pallets) are fully recyclable and can easily be reused.

The permanent monitoring of processes and systems allows an improvement in quality with the minimum wastage and optimisation of resource thus reducing the environmental impact of these activities. Cinca implements tight systems of environmental control which in many cases are far beyond the strict legal requirements established in the European Union.

Under normal usage, the life expectancy of wall and floor tiles is superior to any other product in a similar application. Ceramic products are considered completely inert and require no special care when recycled. In the event of renovation, ceramic tiles can be easily removed and recycled as raw materials in other industries.

CINCA: Ceramics with quality with respect for nature.

Qualität, Umwelt und Sicherheit

CINCA ist sich seiner Rolle bewusst eine ausgewogene Zukunft zu erschaffen. Daher hat CINCA ein integriertes Verwaltungssystem entwickelt, angewendet und erhält dieses aufrecht. Dieses System umfasst die Bereiche Qualität, Umwelt und Sicherheit und stützt sich auf die internationalen Referenznormen ISO 9001, ISO 14001 und OHSAS 18001.

Die von CINCA hergestellten Boden- und Wandfliesen werden auf dem, für die keramische Industrie, höchsten verfügbaren technischen Standard (BAT - Best Available Techniques) produziert, der es ermöglicht den Energie - und Rohstoffverbrauch auf ein Minimum zu reduzieren. Bei der Herstellung der keramischen Fliesen von CINCA werden ausschliesslich natürliche Rohstoffe und zertifiziertes Glas verwendet. Das Verpackungsmaterial (Kartons, Folien und Paletten) ist vollständig recyclebar und kann problemlos wiederverwendet werden.

Die ständige Aufsicht von Prozessen und Systemen erlaubt es die Qualität zu verbessern, die Abfälle zu vermindern und die Ressourcen zu maximieren, sodass die Auswirkungen auf die Umwelt auf ein Minimum reduziert werden. CINCA hat strenge Systeme zur Umweltkontrolle, die in vielerlei Hinsicht über die strengen gesetzlichen Anforderungen der Europäischen Union hinaus gehen.

Bei normalem Gebrauch übertrifft die Lebenserwartung von Boden-und Wandfliesen jedes andere Produkt, das für eine ähnliche Anwendung verwendet werden kann. Keramische Erzeugnisse gelten als vollkommen inert und erfordern keine besondere Pflege bei der Abfallbeseitigung. Im Falle einer Erneuerung können keramische Fliesen problemlos recycelt und als Rohstoffe für andere Branchen weiterverwendet werden.

CINCA: Qualitätskeramik mit Respekt für die Natur.

D4

O símbolo (D1, D2, D3 ou D4) classifica a variação da tonalização da cor das peças cerâmicas de uma série.

Parmi les symboles (D1, D2, D3 ou D4) nous indiquons le degré de variation chromatique entre les carreaux contenus dans chaque serie.

This symbol (D1, D2, D3 or D4) classifies the chromatic shade variation among pieces of tile in one range.

Mit den Abkürzungen (D1, D2, D3 oder D4) will man den Farbabweichungsgrad jeder Fliese einer Serie Klassifizieren.

Recomendações para Assentamento

Para obter melhores resultados das características do produto, a CINCA recomenda antes do assentamento a mistura das peças de várias caixas.

Recommandation pour la pose

Afin de tirer profit au mieux des caractéristiques techniques du produit, CINCA recommande de mélanger les pièces de différentes boîtes.

Laying Recommendations

CINCA recommends blending different pieces from different cartons before installation, in order to maximize the aesthetic beauty of the product line.

Hinweise zur Verlegung

Um die besten Resultate mit unserem Produkt erzielen zu können, schlägt CINCA vor, Fliesen von verschiedenen Kartons vor der Verlegung zu mischen.

Aplicação e Manutenção dos Decorados | Application et Entretien des Piéces Décorées
Application and Maintenance of Decorative Pieces | Verlege-und Pflegeanweisung für die Dekore

Os azulejos decorados da CINCA produzidos em 3ª Fogo resultam de processos de decoração especiais, recorrendo a vidrados que apresentam sedutores efeitos visuais. Como peças especiais que são requerem uma manipulação cuidadosa que preserve a sua beleza. Para a sua colocação recomendamos que as peças sejam manipuladas com cuidado, para evitar riscos, e que estejam secas e limpas. A superfície dos produtos decorados deve ser protegida durante a aplicação, evitando ao máximo o seu contacto com argamassas de assentamento e/ou rejuntamento. Os eventuais excedentes de materiais de colocação devem ser imediatamente limpos, evitando-se que endureçam e colem à superfície das peças. Para limpar os excedentes de materiais de colocação deve apenas ser usada uma esponja limpa e água em abundância sendo totalmente vedada a utilização de agentes de limpeza abrasivos ou contendo ácidos.

Para a manutenção corrente dos materiais deve-se evitar o uso de detergentes enérgicos e/ou produtos ou utensílios de limpeza abrasivos pois podem causar danos irreversíveis nas peças.

A limpeza deve ser assegurada apenas com recurso a água e sabão neutro.

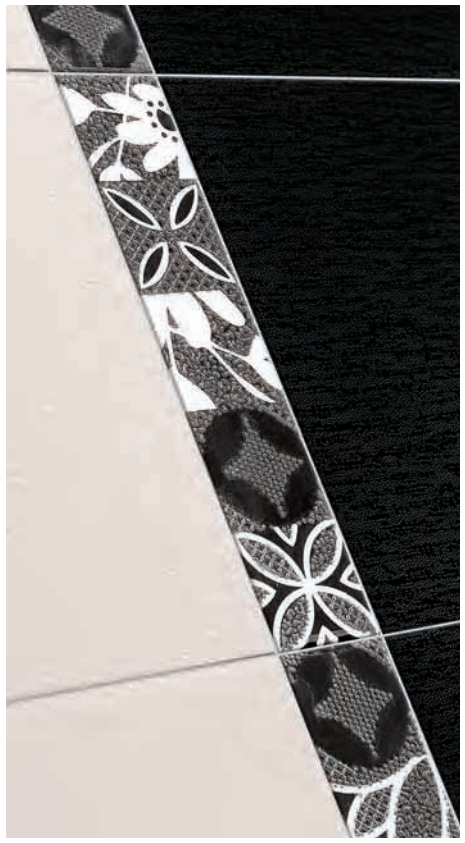
Estes produtos podem apresentar normais diferenças de tonalidade decorrentes desta técnica de fabrico.

Decorative tiles produced by CINCA in 3rd firing are the result of special decorative processes and techniques along with the use of glazes that offer seductive visual effects. Handling of these pieces requires careful manipulation in order to preserve its beauty. For application, we recommend pieces are handled with care to avoid scratches or breakage. It is also recommended you ensure pieces are clean and dry before application. We also recommend protection of the surface to avoid contact with glue or mortar during the application process. Any excess glue or mortar in contact with the surface should be cleaned immediately to avoid hardening or gluing. Excess glue or mortar should be removed using a clean sponge with abundant water. The use of abrasive cleaning agents or those containing acid is strictly forbidden.

For cleaning and maintenance purposes avoid using energic detergents and abrasive utensils as these may cause irreversible damage to the decorative pieces.

Only the use of clean water and neutral soap is recommended.

These products may show shading variations as a consequence of the production processes and techniques used during manufacturing.



Les carreaux de faïence décorés CINCA, produits en 3ème feu, sont le résultat d'un procédé de décoration spécial, recourant à des émaux ou autres matières aux effets visuels précieux et uniques. C'est donc comme pièces « précieuses » qu'ils doivent être manipulés avec soin afin de conserver leur beauté et originalité. Pour une bonne et correcte application et pour éviter toutes rayures, nous recommandons une manipulation délicate, les pièces devant être séchées et nettoyées au préalable. La surface des pièces décorées doit être protégée durant l'application, évitant au maximum son contact avec le ciment colle et/ou le joint. Les éventuels excédents de matière doivent être immédiatement nettoyés afin d'éviter qu'ils ne sèchent et qu'ils ne collent sur la surface des pièces. Pour nettoyer ces excédents, utiliser uniquement une éponge propre bien imbibée d'eau. Il est formellement interdit d'utiliser tout produit de nettoyage abrasif ou contenant des acides.

Pour le nettoyage courant, il faut éviter tout détergent énergique et/ou produit ou ustensile de nettoyage abrasifs, au risque de causer des dommages irréversibles sur les pièces.

Le nettoyage doit être fait uniquement à l'aide d'eau et de savon neutre.

Ces pièces peuvent aussi présenter des différences normales de tonalité, dérivées justement de cette technique spéciale de fabrication.

CINCA's, im Drittbrand hergestellten, Dekorfliesen sind Erzeugnisse aus speziellen Dekorationsverfahren, mit Glasuren die verführerische visuelle Effekte vorweisen. Diese besonderen Fliesen sollten behutsam behandelt werden, damit sie ihre Schönheit bewahren. Bei der Verlegung dieser Fliesen empfehlen wir eine sorgsame Behandlung damit Kratzer vermieden werden, auch sollten die Fliesen trocken und sauber sein. Die dekorierte Oberfläche der Produkte sollte während der Verlegung geschützt werden, um so den Kontakt mit dem Zementmörtel und / oder Fugenmaterial zu vermeiden. Etwaige Überschüsse dieser Materialien sollten sofort von den Fliesen vorsichtig entfernt werden, um das Verhärten an der Oberfläche der Fliesen zu vermeiden. Für die Reinigung bitte ausschliesslich einen sauberen Schwamm und viel Wasser verwenden. Reinigungsmittel die Säuren enthalten oder Scheuermittel dürfen nicht verwendet werden.

Für die alltägliche Säuberung und Pflege dieser Fliesen, vermeiden Sie bitte scharfe Reinigungsmittel und/ oder scheuernde Reinigungsutensilien, da diese irreversible Schäden an den Fliesen verursachen können.

Die Reinigung sollte nur mit Seife und Wasser erfolgen.

Diese Erzeugnisse können normale Brandfarbenunterschiede aufweisen, auf Grund dieser Produktionstechnik.

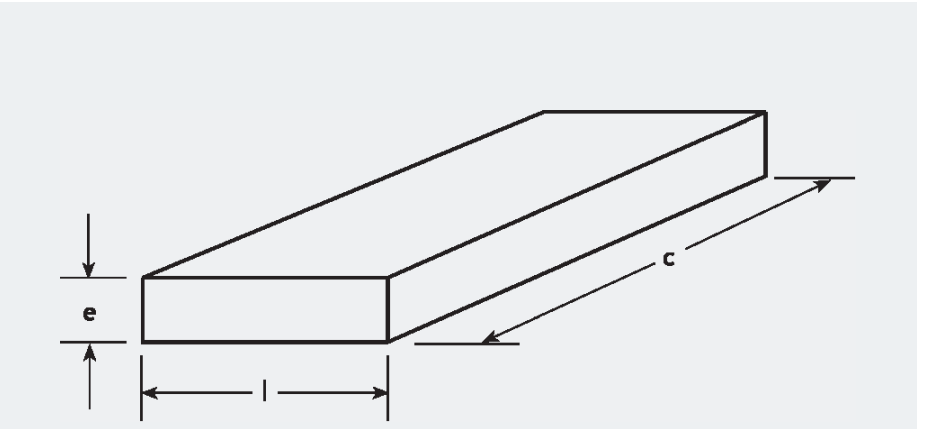
Formatos Modulares e Não Modulares / Modular and Non-modular Formats

Podem ser considerados formatos modulares aqueles cuja dimensão nominal (de designação) é múltipla ou submúltipla do módulo M (M = 100mm segundo a ISO 1006) e cuja superfície é igual ou superior a 9000mm². Estes formatos são identificados por uma letra M antes da sua designação nominal (p.e.: M20x20cm). Nos formatos modulares, a dimensão nominal inclui a junta, conforme as observações seguintes.
Todos os restantes formatos são considerados não modulares.

Formats considered modular are those whose nominal dimensions are multiples or submultiples of M (according to the ISO 1006 standard, M = 100mm) and with a surface area equal or superior to 9000mm². These formats are identified by a letter M before their nominal designation (e.g.: M20x20cm). In modular formats, the nominal size includes the joint, as described in the following remarks.
All other formats are considered non-modular.



Obs. 1

Porcelânico Plena Massa, Decorado / Full Body Porcelain Tiles, Decorated
Porcelânico Plena Massa, Vidrado / Full Body Porcelain Tiles, Glazed
Porcelanato Vidrado / Glazed Porcelain Stoneware
Grés Vidrado / Glazed Floor Tiles

Segundo o prescrito na norma EN 14411, nos formatos modulares do Grupo BIa e BIb, a dimensão nominal inclui uma largura de junta entre 2 e 5mm. A dimensão de fabrico do produto situa-se pois entre 2 a 5mm abaixo da dimensão nominal de designação do produto (p.e. para um M20x20cm poderá ser 197x197mm). Para formatos não modulares a diferença da dimensão de fabrico para a dimensão nominal não pode ser superior a ± 2% ou máx. 5mm.
Por outro lado, dada a grande retracção (7 a 8%) que sofre o material durante o processo de cozedura, a dimensão de fabrico (igual a calibre) é determinada no processo, durante a fase de escolha, e impressa em cada embalagem. (p.e.: o M20x20cm pode ter calibres 196, 197 ou 198mm).

According to the applicable standards EN 14411, for modular formats of the Group BIa and BIb, the nominal dimensions of the modular formats include a joint that varies from 2 to 5mm. The production size is therefore 2 to 5mm smaller than the nominal dimension of the format (e.g.: M20x20cm might be 197x197mm). For non-modular formats the difference between the production size and the nominal size cannot be higher than ± 2% or max. 5mm.
Due to the high contraction (7 to 8%) of the material during the firing process, the production size (also designated as the caliber) is determined within the process, when the final selection is made. The size (caliber) is printed onto each box (e.g.: M20x20cm may have calibers of 196, 197 or 198mm).

Obs. 2

Faiança Vidrada / Glazed Wall Tiles

Segundo o prescrito nas normas aplicáveis, nos formatos modulares do Grupo BIII a dimensão nominal inclui uma largura de junta entre 1,5 e 5mm. Para formatos não modulares a diferença da dimensão de fabrico para a dimensão nominal não pode ser superior a ± 2mm.

According to the applicable standards, for modular formats of the Group BIII the nominal dimensions include a joint that varies from 1,5 to 5mm. In non-modular formats the difference between the production size and nominal size cannot be more than ± 2mm.

Obs. 3

Grés Extrudido / Extruded Tiles

Segundo as normas aplicáveis, nos formatos não modulares do Grupo AIa, AIb e AIIa-1 a diferença da dimensão de fabrico para a dimensão nominal não pode ser superior a ± 3mm.
Dada a grande retracção (10 a 11%) que sofre o material durante o processo de cozedura, a dimensão de fabrico (igual a calibre) é determinada no processo, durante a fase de escolha, e impressa em cada embalagem. (p.e.: 24x24 Calibre 240 ou 242 mm).

According to the applicable standards, for non-modular formats of the Group AIa, AIb and AIIa-1 the difference between the production size and nominal size cannot be more than ± 3mm.
Due to the high contraction (10 to 11%) of the material during the firing process, the production size (also designated as caliber) is determined within the process, when the final selection is made. The size (caliber) is printed onto each box (e.g.: 24x24 caliber 240 or 242mm).

Os pavimentos cerâmicos que estão dotados de características antiderrapantes contribuem duma forma eficaz e activa para a segurança dos utilizadores. Estes produtos apresentam especificações particulares, das quais se destaca a resistência ao escorregamento. Com ampla divulgação na indústria cerâmica, as normas alemãs que permitem determinar o coeficiente de escorregamento subdividem os testes em dois grupos distintos: o escorregamento calçado, aplicável em zonas em que os utilizadores circulam normalmente calçados, e o escorregamento "pé descalço", aplicável a zonas em que os utilizadores circulam descalços, como piscinas, balneários, etc.
Os testes são conduzidos com recurso a equipamento especial e a uma pessoa que simula a circulação sobre o pavimento (ora calçado ora descalço, consoante o teste que se pretende levar a cabo), num plano inclinado que gradualmente vai aumentando o seu ângulo de inclinação.
O ângulo máximo atingido antes do desiquilíbrio determina o grupo de antiderrapância que permite classificar os produtos. Existe uma escala de antiderrapância própria que se apresenta nos quadros ao lado:

Antiderrapância "Calçado" / Slip Resistance "With Footwear"

	Classe / Class		Ângulo de Inclinação Slope Angle	
	(DIN 51130)	XP P 05 - 010/011 (Pieds Chaussés)		
	R9	PC 6	de 6° a 10° from 6° to 10°	Baixo atrito Low friction
	R10	PC 10	acima de 10° até 19° more than 10° to 19°	Atrito normal Normal friction
	R11	PC 20	acima de 19° até 27° more than 19° to 27°	Atrito melhorado Improved friction
	R12	PC 27	acima de 27° até 35° more than 27° to 35°	Alto atrito High friction
	R13	PC 35	acima de 35° more than 35°	Muito alto atrito Very high friction

Ceramic floor tiles developed with slip resistant characteristics contribute actively to the safety of the users. Amongst the many particular specifications of these products, the slip resistance are notable. Well known in the Ceramic Industry, the German standards, which help determine the slip resistance coefficient, divide the tests into two groups. In the first group, the tests are executed simulating the use of footwear. In the second group, the tests are run simulating barefoot traffic in areas such as swimming pools, shower areas etc.
Special equipment is used to perform the tests and a person will simulate walking (with or without footwear, dependant on the test) on a sloping tiled surface. The slope angle is subject to a gradual increase. The highest slope angle achieved before slipping determines the slip resistance classification. A table with the slip resistance ratings is shown below.

Antiderrapância "Pé Descalço" / Slip Resistance "Barefoot"

	Classe / Class		Ângulo de Inclinação Slope Angle	
	(DIN 51097)	XP P 05 - 010/011 (Pieds Nus)		
	-	PN 6	≥ 6°	Baixo atrito Low friction
	A	PN 12	≥ 12°	Atrito normal Normal friction
	B	PN 18	≥ 18°	Atrito melhorado Improved friction
	C	PN 24	≥ 24°	Alto atrito High friction

alimentaires, etc...) Dans les deux cas, des résultats d'analyses pourront être fournis sur les produits CINCA sur toute demande des clients fonction de chaque cas et en accord avec les réglementations nationales en vigueur. / According to European standard norms (EN 14411, Annexe Q) ceramic products for floor and wall should not release Cadmium (Cd). The release of Lead (Ph) should be taken into consideration in situations where the products are in direct contact with food (i.e.: in the case of kitchen work surfaces, the food industry etc.). In both situations the CINCA product test results can be provided to the client if required. Taking into consideration where the products will be used and according to relevant National Regulations. / Entsprechend der gültigen europäischen Norm (EN 14411, Anhang Q) dürfen keramische Materialien für Boden-, und Wandbelag kein Kadmium (Cd) freisetzen. Auch die Freisetzung von Blei (Pb) sollte in diesem Zusammenhang berücksichtigt werden, vor allem in den Fällen, wo die Produkte in direktem Kontakt mit Lebensmittel stehen (für Anwendungen in Küchen, Nahrungsmittelindustrie, etc.). In beiden Fällen können auf Anfrage, in Abhängigkeit der für die Produkte vorgesehenen Anwendungen und in Übereinstimmung mit den gültigen nationalen Bestimmungen, Analyseergebnisse von CINCA Produkten zur Verfügung gestellt werden.

alimentaires, etc...) Dans les deux cas, des résultats d'analyses pourront être fournis sur les produits CINCA sur toute demande des clients fonction de chaque cas et en accord avec les réglementations nationales en vigueur. / According to European standard norms (EN 14411, Annexe Q) ceramic products for floor and wall should not release Cadmium (Cd). The release of Lead (Ph) should be taken into consideration in situations where the products are in direct contact with food (i.e.: in the case of kitchen work surfaces, the food industry etc.). In both situations the CINCA product test results can be provided to the client if required. Taking into consideration where the products will be used and according to relevant National Regulations. / Entsprechend der gültigen europäischen Norm (EN 14411, Anhang Q) dürfen keramische Materialien für Boden-, und Wandbelag kein Kadmium (Cd) freisetzen. Auch die Freisetzung von Blei (Pb) sollte in diesem Zusammenhang berücksichtigt werden, vor allem in den Fällen, wo die Produkte in direktem Kontakt mit Lebensmittel stehen (für Anwendungen in Küchen, Nahrungsmittelindustrie, etc.). In beiden Fällen können auf Anfrage, in Abhängigkeit der für die Produkte vorgesehenen Anwendungen und in Übereinstimmung mit den gültigen nationalen Bestimmungen, Analyseergebnisse von CINCA Produkten zur Verfügung gestellt werden.
