Fábrica Cerâmica de Valadares S.A. : A alma e o Saber

Em 2011 a Fábrica Cerâmica de Valadares S.A. completa 90 anos, integralmente dedicados à produção de artigos cerâmicos. A sua história está repleta de sucessos e de mudança ao longo dos anos, tendo passado pelo fabrico de artigos de Cerâmica estrutural, Revestimentos e Pavimentos e pelo Sanitário. Nos últimos 30 anos a Fábrica Cerâmica de Valadares S.A. dedicou-se exclusivamente ao Sanitário.

Uma empresa com tantos anos tem obrigatoriamente de ter uma “Alma” construída pela experiência e saber da Cerâmica, que toma “Corpo” na dedicação e competência dos seus Colaboradores e Parceiros.

Cada novo artigo é encarado como uma nova oportunidade de evoluir e surpreender.

O considerável investimento que a Fábrica Cerâmica de Valadares S. A. realiza na investigação de novas soluções técnicas e materiais é recompensado largamente com a noção de que está na linha da frente da produção de Sanitário, quanto a parâmetros de Qualidade, Design e Inovação nesta área de negócio muito exigente e competitiva.

De olhos sempre postos no futuro, a Fábrica Cerâmica de Valadares S.A. não hesitou em mudar uma e outra vez para se adaptar e até antecipar às mudanças no mercado. Hoje vende artigos Sanitários em cerca de 60 Países com especificações e necessidades diferentes, e cada novo cliente é encarado como um desafio de provar do que somos capazes.

É justa uma palavra para os nossos Fornecedores, que têm um papel fundamental na Qualidade do serviço que prestamos aos nossos clientes e que muito nos têm ajudado no desenvolvimento e comercialização de novos materiais e mercadorias. Aos nossos Clientes, resta-nos desejar que no nosso catálogo encontrem resposta às vossas necessidades e que vos possamos surpreender com a qualidade e originalidade da nossa oferta. O nosso compromisso é o de garantir que têm na Fábrica Cerâmica de Valadares S.A. uma Empresa inteiramente dedicada a corresponder às vossas melhores expectativas. Até breve.

The soul and knowledge.

In 2011 the Fabrica Ceramica Valadares, SA fullfill 90 years, fully dedicated to the production of ceramic pieces. Its history is replete with successes and change over the years, having gone through the manufacture of structural ceramics, tiles and Sanitaryware. Over the past 30 years the Fábrica Cerâmica de Valadares, SA devoted exclusively to Sanitaryware. A company with many years must have had a "soul" built by experience and knowledge of Ceramics, which makes "Body" the dedication and skill of its employees and partners.

Each new article is seen as a new opportunity to evolve and surprise.

The considerable investment that performs Fábrica Cerâmica de Valadares, SA in researching new materials and technical solutions is largely rewarded with the notion that he is in the forefront of production of Health, as the parameters of quality, design and innovation in this business too demanding and competitive.

Looking to the future, Fábrica Cerâmica de Valadares, SA not hesitate to change another time and another to adapt to and even anticipate market changes. Today sells Sanitaryware items in about 60 countries with different needs and specifications, and each new customer is seen as a challenge to prove what we can.

It's fair just a word for our suppliers, who have a key role in the quality of service we provide to our customers and which have greatly helped in the development and commercialization of new materials and goods.

To our clients, we can only hope that our catalogue is responding to your needs and that you can surprise with the quality and originality of our offer. Our commitment is to ensure that they have in Fábrica Cerâmica de Valadares, SA a company fully dedicated to meet your highest expectations.

See you soon.

L'âme et la connaissance

En 2011, la Fábrica Ceramica de Valadares, SA complète de 90 ans, entièrement dédié à la production de céramique. Son histoire est remplie de succès et les changements au fil des ans, après avoir traversé la fabrication de céramiques de construction, de revêtements et de sanitaire. Au cours des 30 dernières années, Fábrica Cerâmica de Valadares, SA consacré exclusivement au Sanitaire.

Une entreprise ayant de nombreuses années doivent avoir une «âme» construit par l'expérience et les connaissances de la céramique, ce qui rend "Corps" au dévouement et la compétence de ses employés et partenaires.

Chaque nouvel article est considéré comme une nouvelle opportunité d'évoluer et de surprise.

Les investissements considérables qui effectue Fábrica Cerâmica de Valadares, SA dans la recherche de nouveaux matériaux et des solutions techniques sont largement récompensés par la notion qu'il est à la pointe de la production du sanitaire, que les paramètres de qualité, de design et d'innovation dans ce secteur trop exigeant et compétitif.

Quant à l'avenir, Fábrica Cerâmica de Valadares, SA n'a pas hésite à changer une autre fois et une autre à s'adapter et même anticiper les évolutions du marché. Aujourd'hui Fábrica Cerâmica de Valadares, SA, vend des articles dans environ 60 pays qui ont des besoins différents et des spécifications, et chaque nouveau client est considéré comme un défi de prouver ce que nous pouvons.

C'est juste un mot pour nos fournisseurs, qui ont un rôle clé dans la qualité de service que nous offrons à nos clients et qui ont grandement contribué à l'élaboration et la commercialisation de nouveaux matériaux et des marchandises.

Pour nos clients, nous ne pouvons qu'espérer que, dans notre catalogue sont les réponses à vos besoins et que vous pouvez surprendre par la qualité et l'originalité de notre offre. Notre engagement est de veiller à ce qu'ils ont dans Fábrica Cerâmica de Valadares, SA une société entièrement dédiée pour répondre à vos attentes les plus élevées.

Vous voir bientôt.

18570002 Urinol s/ água Hello | Urinal waterless Hello | Urinoir sans eau Hello

A pensar no futuro sustentado do Planeta e no facto de:
 Cerca de 97% das reservas de água do mundo serem salgadas
 Uma em cada 8 pessoas não tem acesso a água potável
 Todos os anos 1,8 milhões de pessoas morrem devido ao consumo de água imprópria
 São necessários 1.350 litros de água para se produzir 1 Kg de trigo
 Na Europa Ocidental cada pessoa gasta por dia cerca de 40 litros de água em descargas sanitárias
 Um urinol, em média, consome cerca de 80 000 a 120 000 litros de água por ano!!!
 a Valadares apresenta o URINOL HELLO, preparado para receber um sistema de desinfecção sem água da Espace Écologie. Esta tecnologia permite:

- eliminar o consumo de água,
- erradicar maus cheiros,
- eliminar calcário da superfície vidrada
- evita o entupimento das tubagens
- simplifica a manutenção quotidiana

O sistema é de fácil aplicação e substituição. A sua montagem é feita no furo de esgoto do urinol com a recarga (Ogiva) posicionada na parte superior. É fornecida uma chave para uma fácil substituição.
 A substituição da recarga é feita trimestralmente em situações de grandes utilizações (Centros Comerciais, Estações de Serviço...) e semestralmente em situações de utilização média (Escolas, Cafés...).
 Na limpeza diária é suficiente a passagem de uma esponja humedecida com um detergente neutro.
 Se considerarmos um urinol com uma taxa de utilização média (250 descargas de 2 litros) o consumo diário será de 0.5 m³ de água. Sendo o custo aproximado de 4€/ m³ a factura anual será de 700€.
 Em alternativa, os custos associados ao Urinol HELLO e respectivo sistema desodorizante encontram-se exemplificados na tabela abaixo:

	Custo Inicial	Recargas Anuais	Custo Anual	Factura anual água por urinol	Poupança anual por urinol
1º Ano	415€	180€	595€	700€	105€
2º Ano e seguintes	-	240€	240€	700€	460€

BASE DE CHUVEIRO COM AQUECIMENTO INTEGRADO - WARMUP

* Para Base de Chuveiro ARIS

CARACTERÍSTICAS

Base de chuveiro Valadares, em GRESANIT[®], com adaptação de resistência Warmup com 110W de potência, com corrente de 24V e 4,6A.

Temperatura da superfície de aproximadamente 30°C com sistema de controlo. Tempo de aquecimento de cerca de 20 a 30 minutos.

Utilização de transformador 220V/24V.

Equipamento fornecido com a base: cabo de ligação ao transformador; transformador. Garantia de 5 anos contra defeitos de fabrico.

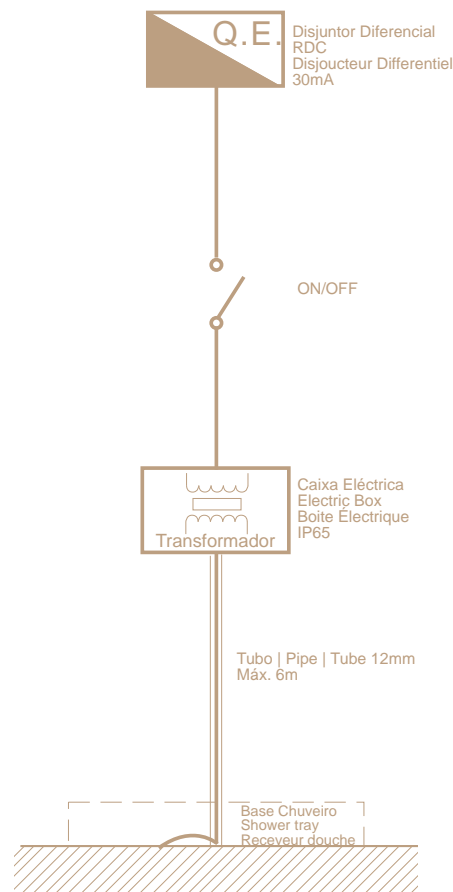

DADOS DE INSTALAÇÃO

A base de chuveiro não deverá ser encastrada na parede, de forma a ser facilitado o acesso em caso de anomalia. Fazer vedação com silicone ou similar.

O cabo de alimentação da base de chuveiro tem um comprimento de 6m e é já fornecido devidamente instalado na base. A sua ligação à base de chuveiro não deverá ser violada. Este cabo poderá ser cortado no lado de ligação ao transformador, em função das características da instalação. O transformador (fornecido) será instalado entre a fonte de alimentação e a base de chuveiro. A distância máxima entre o transformador e a base é de 6m. Deverá ser instalado numa caixa eléctrica encastrada na parede com protecção de humidade mínima IP65.

Na linha de alimentação ao transformador deverá ser instalado um interruptor ON/OFF (não fornecido), a colocar junto aos interruptores de iluminação da casa de banho (recomendado).

Na linha de alimentação à base de chuveiro é obrigatória a instalação de um disjuntor diferencial de 30mA, o qual deverá ser instalado no quadro eléctrico da habitação.

SHOWER TRAY WITH HEATING SYSTEM - WARMUP

* For Shower Tray ARIS

CHARACTERISTICS

Shower Tray Valadares, in GRESANIT[®], with adaptation of resistance Warmup with 110W of power, with a voltage of 24V and current of 4.6 A.

Surface temperature is around 30° C with a heating control system. Warm up time about 20 to 30 minutes.

Use of 220V/24V transformer.

Equipment provided with the Shower Tray: cable for connecting to the transformer; transformer. Guarantee of 5 years against defects in workmanship.

INSTALLATION DATA

The Shower Tray should not be recessed in the wall to guarantee an easier access in case of failure. Make sealing with silicone or similar.

The cable from the shower tray has a 6 meters length and is already supplied with the shower tray. This connection to the shower tray should not be violated. The cable can be cut to provide the connection to the transformer, depending on bathroom's layout.

Transformer (supplied) will be installed between the power supply and shower tray. The maximum distance between the transformer and the shower tray is 6 m. It should be installed in an electricity box recessed in the wall with protection from moisture minimum IP65.

In the power supply to the transformer should be installed a switch ON / OFF (not supplied), to put it near the switches for bathroom's lighting (recommended).

In the power supply to the shower tray is obligatory installation of RCD of 30mA, which must be installed on the switchboard of housing.

BAC À DOUCHE AVEC CHAUFFAGE | WARMUP

* Pour Bac à douche ARIS

CARACTÉRISTIQUES

Receveur de douche Valadares fabriqué en GRESANIT[®] avec adaptation de résistance électrique Warmup de 110W, 24V et 4,6A

Température de surface approximée aux 30°C, avec système de contrôle. Temps de chauffage de 20 a 30 minutes.

Utilisation de transformateur 220V / 24V.

Equipement fourni avec le receveur : câble de liaison au transformateur ; transformateur.

Garantie de 5 années contre défauts de fabrication.

DONNÉS POUR INSTALLATION

Le receveur ne devra pas être encastré dans la paroi, de façon a faciliter l'accès en cas de dommage. Serrer avec silicone ou similaire.

Le câble de liaison du receveur au transformateur a une longueur de 6m et est déjà connecté à la résistance du receveur. Sa liaison au receveur ne devra pas être violée. Ce câble pourra être coupé a la coté de liaison au transformateur en fonction des caractéristiques de l'installation.

Le transformateur (fourni) devra être installé entre la fonte d'alimentation et le receveur. La distance maximale entre le transformateur et le receveur est de 6m. Installer le transformateur dans une boîte électrique avec protection d'humidité minimale IP65.

Dans la ligne d'alimentation au transformateur devra être installé un interrupteur ON / OFF (pas fourni), lequel pourra être placé près des interrupteurs des lumières de la salle a bains (recommandé).

Dans la ligne électrique du receveur est obligatoire l'installation d'un disjoncteur différentiel de 30mA (pas fourni), lequel devra être placé dans le cadre électrique de la maison.

5.1.1 Sistema A económico

6 injectores laterais ar + água, com regulação de direcção
Embelezadores plásticos cromados
Bomba de 680 W
Válvula de descarga automática
Comandos em plástico cromados
Garantia de 2 anos

5.1.2 Sistema A

6 injectores laterais ar + água, com regulação de direcção
Embelezadores em latão
Bomba de 680 W
Control de nível de água
Válvula de descarga automática
Comandos de latão cromados
Garantia de 3 anos

5.1.3 Sistema C

6 injectores laterais ar + água, com regulação de direcção
Embelezadores em latão
8 injectores de ar no fundo da banheira
Bomba de 900 W
Compressor de 800 W
Sensor electrónico de nível de água
Válvula de descarga automática
Comando digital ON/OFF da bomba
ON/OFF do compressor, +/- compressor
Regulador manual de admissão do ar em latão
Sistema de escoamento de águas residuais
Garantia de 3 anos

5.1.1 Economic system

6 plastic plated adjustable jets air + water
Chromed plated mirrors
Pump 680 W
Automatic pop-up waste
Chromed plated controllers
2 years guarantee against manufacture defects

5.1.2 System A

6 plastic plated adjustable jets air + water
Chromed plated mirrors
Pump 680 W
Water control level sensor
Automatic pop-up waste
Chromed plated controllers
3 years guarantee against manufacture defects

5.1.3 System C

6 plastic plated adjustable jets air + water
Chromed plated mirrors
8 water jets at bottom
Pump 900 W
Blower 800 W
Electronic water control level sensor
Automatic pop-up waste
Digital pump controller ON/OFF
ON/OFF blower; +/- blower
Manual adjust of air inlet
Water drainer
3 years guarantee against manufacture defects

5.1.1 Système Economique

6 jets plastique réglables air + eau
Miroirs Chromé
Pompe 680 W
Vidage automatique
Tableau de contrôle chromé
2 ans garantie

5.1.2 Système A

6 jets plastique réglables air + eau
Miroirs Chromé
Pompe 680 W
Contrôle de niveau eau
Vidage automatique
Tableau de contrôle chromé
3 ans garantie

5.1.3 Système C

6 jets plastique réglables air + eau
Miroirs Chromé
8 jets eau sur la base
Pompe 900 W
Blower 800 W
Sensor électronique niveau eau
Vidage automatique
Pompe digitale avec contrôle ON/OFF
ON/OFF Blower, +/- Blower
Ajusteur manuel accès air
Egout
3 ans garantie défauts de fabrication

» A harmonia e simplicidade de formas associada à alta tecnologia de fabrico e às soluções amigas do ambiente.
Os monocomandos de lavatório e de bidê são equipados com perlares de baixo caudal (7 litros / minuto máximo a 4 bar de pressão), permitindo uma redução de consumo de água de cerca de 50%.
Garantia de cinco anos contra defeitos de fabrico.

» The harmony and simplicity of forms associated with high technology and manufacturing solutions to the environment.
The basin mixers and bidet are equipped with low - flow aerator (7 liters /minute up to 4 bars of pressure), allowing a reduction of water consumption of around 50%.
5 Year warranty against manufacturing defects.

» L'harmonie et la simplicité des formulaires liés à la haute technologie et des solutions de fabrication pour l'environnement.
Mono-commandes lavabo et bidet sont équipés avec un débit très bas aérateur (7 litres / minute jusqu'à 4 bars de pression), permettant une réduction de la consommation d'eau d'environ 50%.
5 ans de garantie contre les défauts de fabrication.

DREAM

50602002 Torneira capacitiva Dream | Capacitive tap "Dream" | Capacitif robinet "Dream"
 50602012 Misturadora capacitiva Dream | Capacitive mixer "Dream" | Capacitif mitigeur "Dream"

Estas torneiras são accionadas pelo aproximar das mãos. Ao afastá-las param de imediato. Têm cinco níveis de sensibilidade, definindo a distância de aproximação. Detectam a aproximação das mãos em qualquer ponto da torneira, não sendo necessário aproximá-las de um qualquer sensor, como habitualmente acontece. Funcionam com uma pilha de lítio de 6V. O sistema de controle é posicionado fora da torneira, sob o lavatório ou dentro do respectivo móvel.

These faucets are activated by the approach of the hands, getting away stop them immediately. They have five levels of sensitivity, defining the approach distance. Detect the approach of the hand anywhere on the faucet, eliminating them from approaching a sensor, as usually happens. Work with a 6V lithium battery. The control system is positioned outside the faucet under the sink or inside their furniture.

Ces robinets sont activés par l'approche des mains, loin de les arrêter immédiatement. Ils ont cinq niveaux de sensibilité, de définir la distance d'approche. Détecter l'approche de la main n'importe où sur le robinet, les éliminer de l'approche d'un capteur, comme d'habitude se passe. Travailler avec une pile au lithium 6V. Le système de contrôle est positionné à l'extérieur du robinet sous l'évier ou à l'intérieur de leur meuble.

CARACTERÍSTICAS:

- Corpo principal em GRESANIT;
- Componentes metálicos integralmente produzidos em latão, com cromagem de grande qualidade
- resistência ao nevoeiro salino superior a 500 horas;
- Misturadora termostática e válvula com dispositivo distribuidor de cinco vias;
- Chuveiro manual com suporte de parede;
- 6 injectores com regulação de orientação, dispostas em grupos de duas unidades;
- Grande facilidade de instalação;
- Garantia geral de 5 anos.

FEATURES:

- Main body in GRESANIT;
- Metal components made entirely of brass with chrome plating of high quality - resistance to salt spray than 500 hours;
- Thermostatic mixing valve and device distributor with five tracks;
- Hand shower with wall bracket;
- 6 injectors with regulatory guidance, arranged in three groups of two units;
- Easy to install;
- Guarantee of 5 years general.

CARACTERISTIQUES:

- Corps principal GRESANIT;
- Les composants métalliques entièrement en laiton avec chromage de haute qualité - résistance au brouillard salin de 500 heures;
- Mitigeur thermostatique et distributeur dispositif avec cinq titres;
- Douchette avec support mural;
- 6 Injecteurs avec les orientations réglementaires, répartis en trois groupes de deux unités;
- Facile à installer;
- Garantie de 5 ans en générale.

Gresanit®

Em 2006 a Valadares decidiu reunir esforços da sua equipa técnica para dar resposta a uma exigência do mercado:

Produzir peças cerâmicas de grande dimensão, mas sem as desvantagens de resistência e fiabilidade de produtos similares em Fine FireClay (Grés).

O desafio consistia em obter um material que conferisse boas características de resistência mecânica e ao fendilhamento e que assegurasse a tradicional qualidade dos artigos produzidos pela Cerâmica de Valadares em Porcelana sanitária.

Assim nasceu o Gresanit®, como resultado do trabalho de investigação e desenvolvimento do seu Departamento Técnico, abrindo portas ao fabrico e comercialização de um conjunto apreciável de artigos como Bases de Chuveiro de baixo perfil, Urinóis, Placas para aplicação de lavatórios e outras peças muito específicas. O Gresanit® permitiu alargar notavelmente a sua gama de produtos e oferecer soluções em Cerâmica que concorrem com vantagem com outros materiais alternativos.

A seguir, damos conta dos resultados de testes físicos, para a execução dos quais continuamos a contar com a empresa Ceram Research, da qual somos associados e participantes em diversos programas de investigação e desenvolvimento no domínio da cerâmica dos sanitários.

Gresanit®

In 2006 Valadares decided to bring together the best efforts of its technical team to reply to a market demand.

Producing ceramic pieces which are large but without the disadvantages of resistance and reliability of similar products of Fine FireClay (Sandstone).

And so Gresanit® came about, the upshot of R&D work by its technical department, opening up the way to the manufacture and commercialisation of a considerable set of items such as low profile Shower Bases, Urinals. Plates for the application of washbasins and other very specific pieces. Gresanit® allowed the notable expansion of its range of products and offer Ceramics solutions which have a competitive edge over other alternative materials.

Below we have set out the results of physical tests for the implementation whereof we will still rely on Ceram Research with whom we are associated, participating in various R&D programmes in the field of sanitary ceramics.

Gresanit®

En 2006, Valadares a décidé de déployer des efforts au sein de son équipe technique afin de répondre à une exigence du marché :

Produire des pièces en céramique de grande dimension mas sans les inconvénients des produits similaires en Fine Fire Clay (grès) en matière de résistance et de fiabilité.

Le défi consistait à obtenir un matériau présentant de bonnes caractéristiques de résistance mécanique et au tressailage, pouvant également assurer la qualité traditionnelle des articles en porcelaine sanitaire produits par Cerâmica de Valadares.

C'est ainsi qu'est apparu Grenasit®, suite à un travail de recherche et développement entrepris par le Département Technique. Par la suite, nous avons débuté la fabrication et la commercialisation d'un ensemble d'articles considérable : bases de douche à bas profil, urinoirs, plaques destinées à la pose de lavabos et autres pièces très spécifiques. Grenasit® a ainsi pu élargir remarquablement sa gamme de produits et proposer des solutions en céramique qui représentent plusieurs avantages face à d'autres matériaux alternatifs.

Ensuite, nous présentons les résultats des tests physiques dont l'exécution est assurée par la société Ceram Research dont nous sommes associés. Nous participons également à plusieurs programmes de recherche et développement dans le domaine de la céramique sanitaire.

* Résultat des tests au GRESANIT® et Vitreous China Valadares
